

The Future of Green India

Energy and Climate Change

Tuesday, March 30, 2021; 10am-11:15am EDT/ 7:30-8:45pm IST

This event is organized and sponsored by The Lakshmi Mittal and Family South Asia Institute at Harvard University; Harvard University Center for the Environment; Harvard Project on Climate Agreements; and the Environment and Natural Resources Program, Belfer Center, Harvard Kennedy School. The Harvard Global Institute provided generous support for this event.

India is a vital player in global efforts to deploy clean energy and address climate change – while at the same time widening energy access and fostering economic growth. Expert speakers will consider India’s energy transition and approaches to climate-change policy – both domestically and in collaboration with the global community.

Moderator; **Henry Lee,**

Jassim M. Jaidah Family Director of the Environment and Natural Resources Program and Senior Lecturer in Public Policy, Harvard Kennedy School

Speaker; **Mahua Acharya,**

CEO, Convergence Energy Services Ltd. India

Speaker; **Abhishek Malhotra,**
